

The Morrell logo is located in the top right corner. It consists of the word "MORRELL" in a bold, white, sans-serif font, followed by a registered trademark symbol (®). The background of the entire page is a blurred image of a modern living room with large windows and a television. Overlaid on this background are several semi-transparent circular shapes in shades of blue and grey. In the foreground, a hand is holding a black remote control, with a finger pressing one of the buttons. The remote has various colored buttons (red, green, yellow) and a directional pad.

PRODUCT OVERVIEW

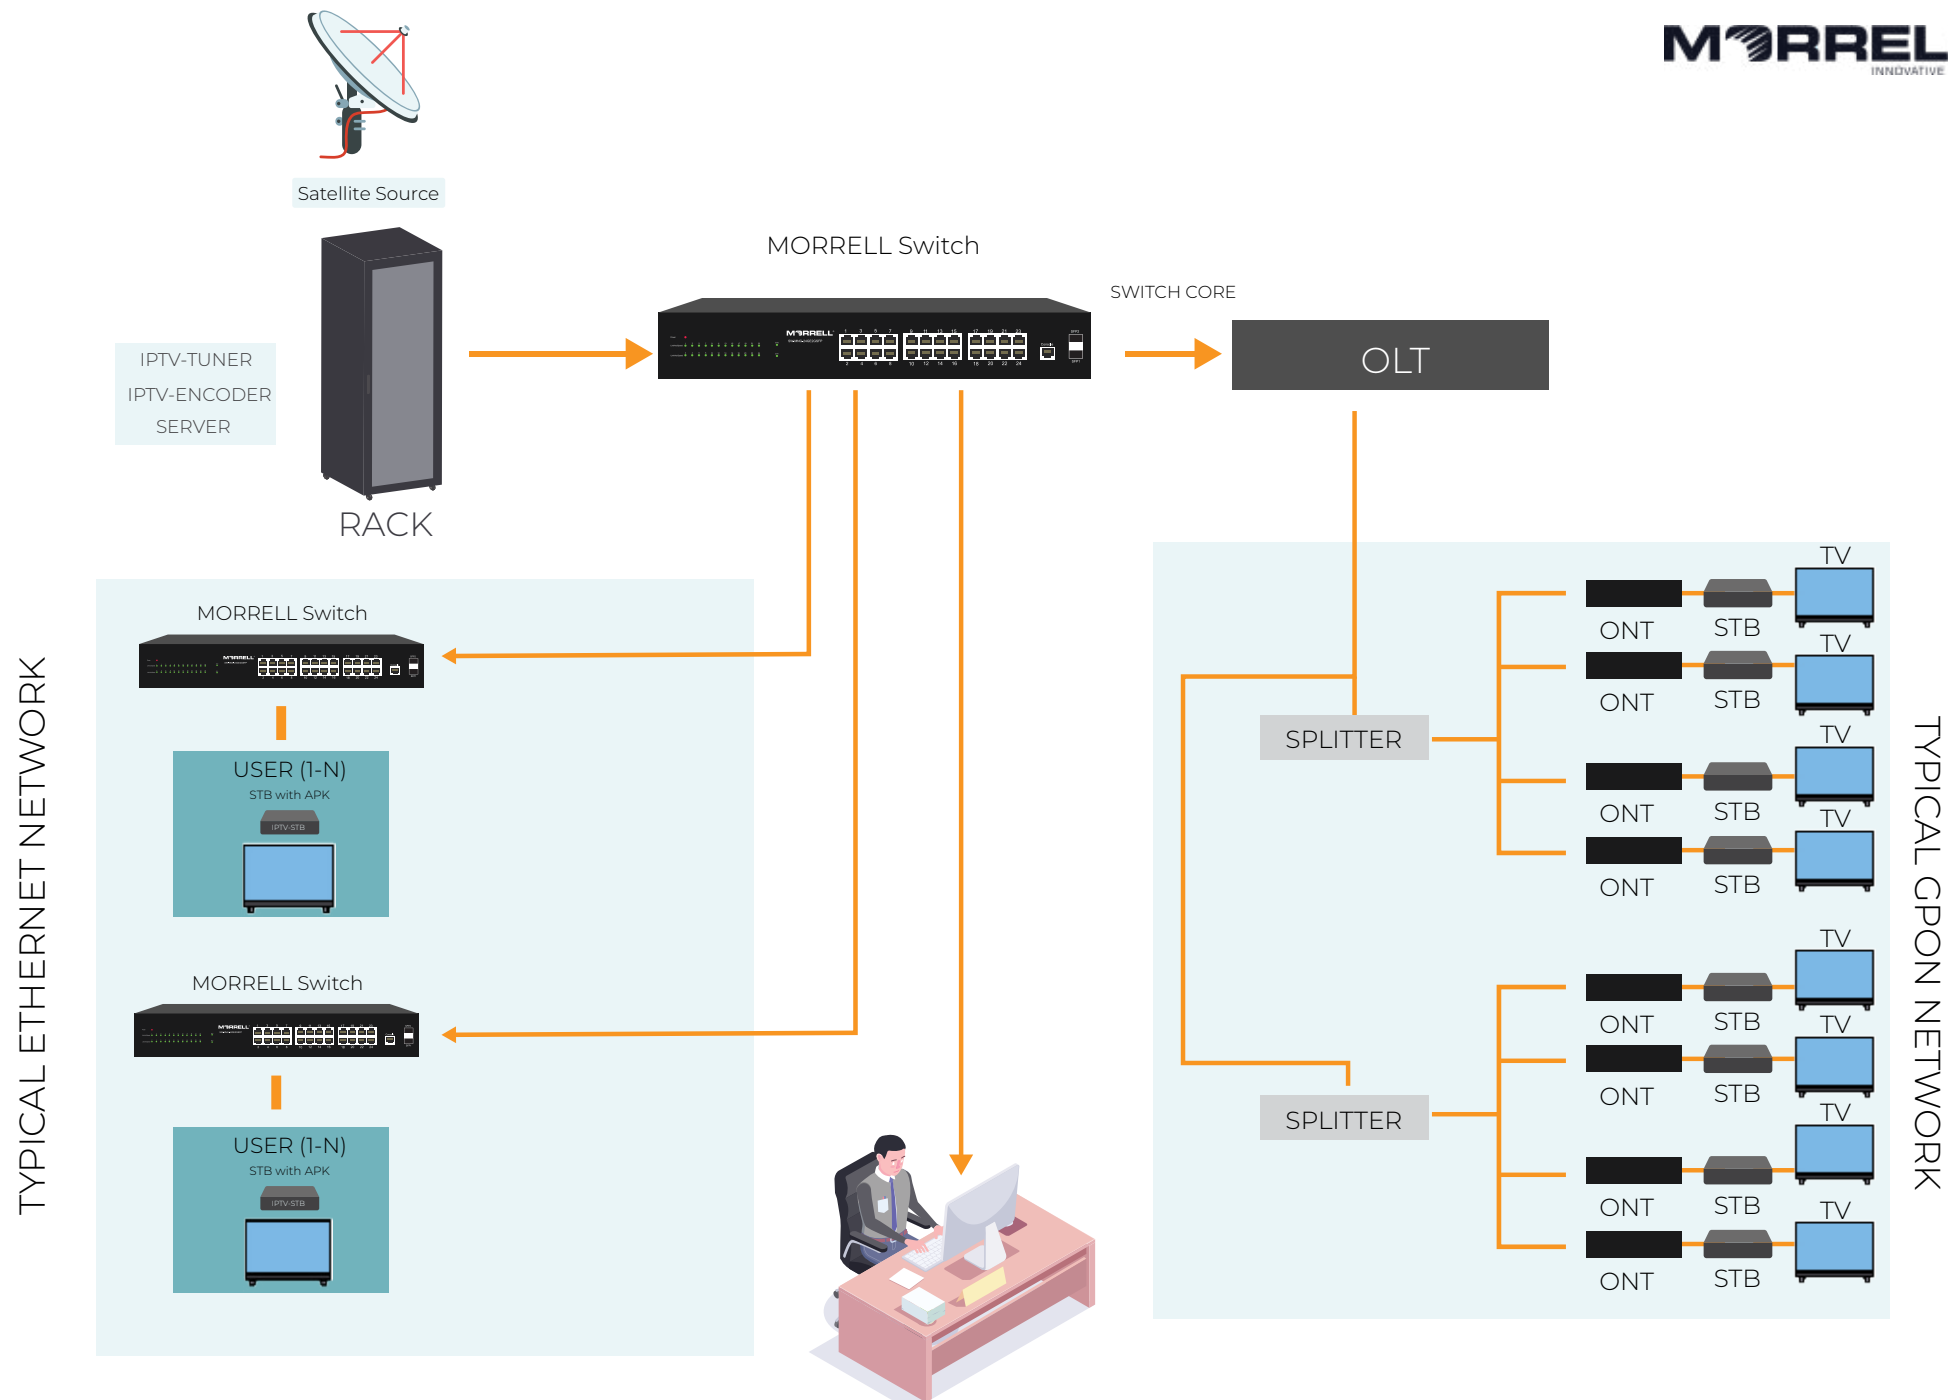

PRODUCT OVERVIEW

IPTV systems add to the TV solutions, the service of hotels, hospitals, and other buildings all over IP networks. Capturing the TV signal through terrestrial or satellite systems passing through the headend to finally reach the room or common areas of the facility. TV signal is combined with the services throughout the system server.

MORRELL IPTV system is open with the user's number, compatible with STBs, and easy to provide Live TV, VOD, room, food, and other services. Its main functions are:

- Manage IPTV channels and features.
- Create and manage users and groups.
- Manage and control players (add, remove and change users).
- Upload music and manage video on demand.

IPTV SYSTEM-PRODUCTS

01 | Tuner to IP Gateway IPTV-Tuner

Features:

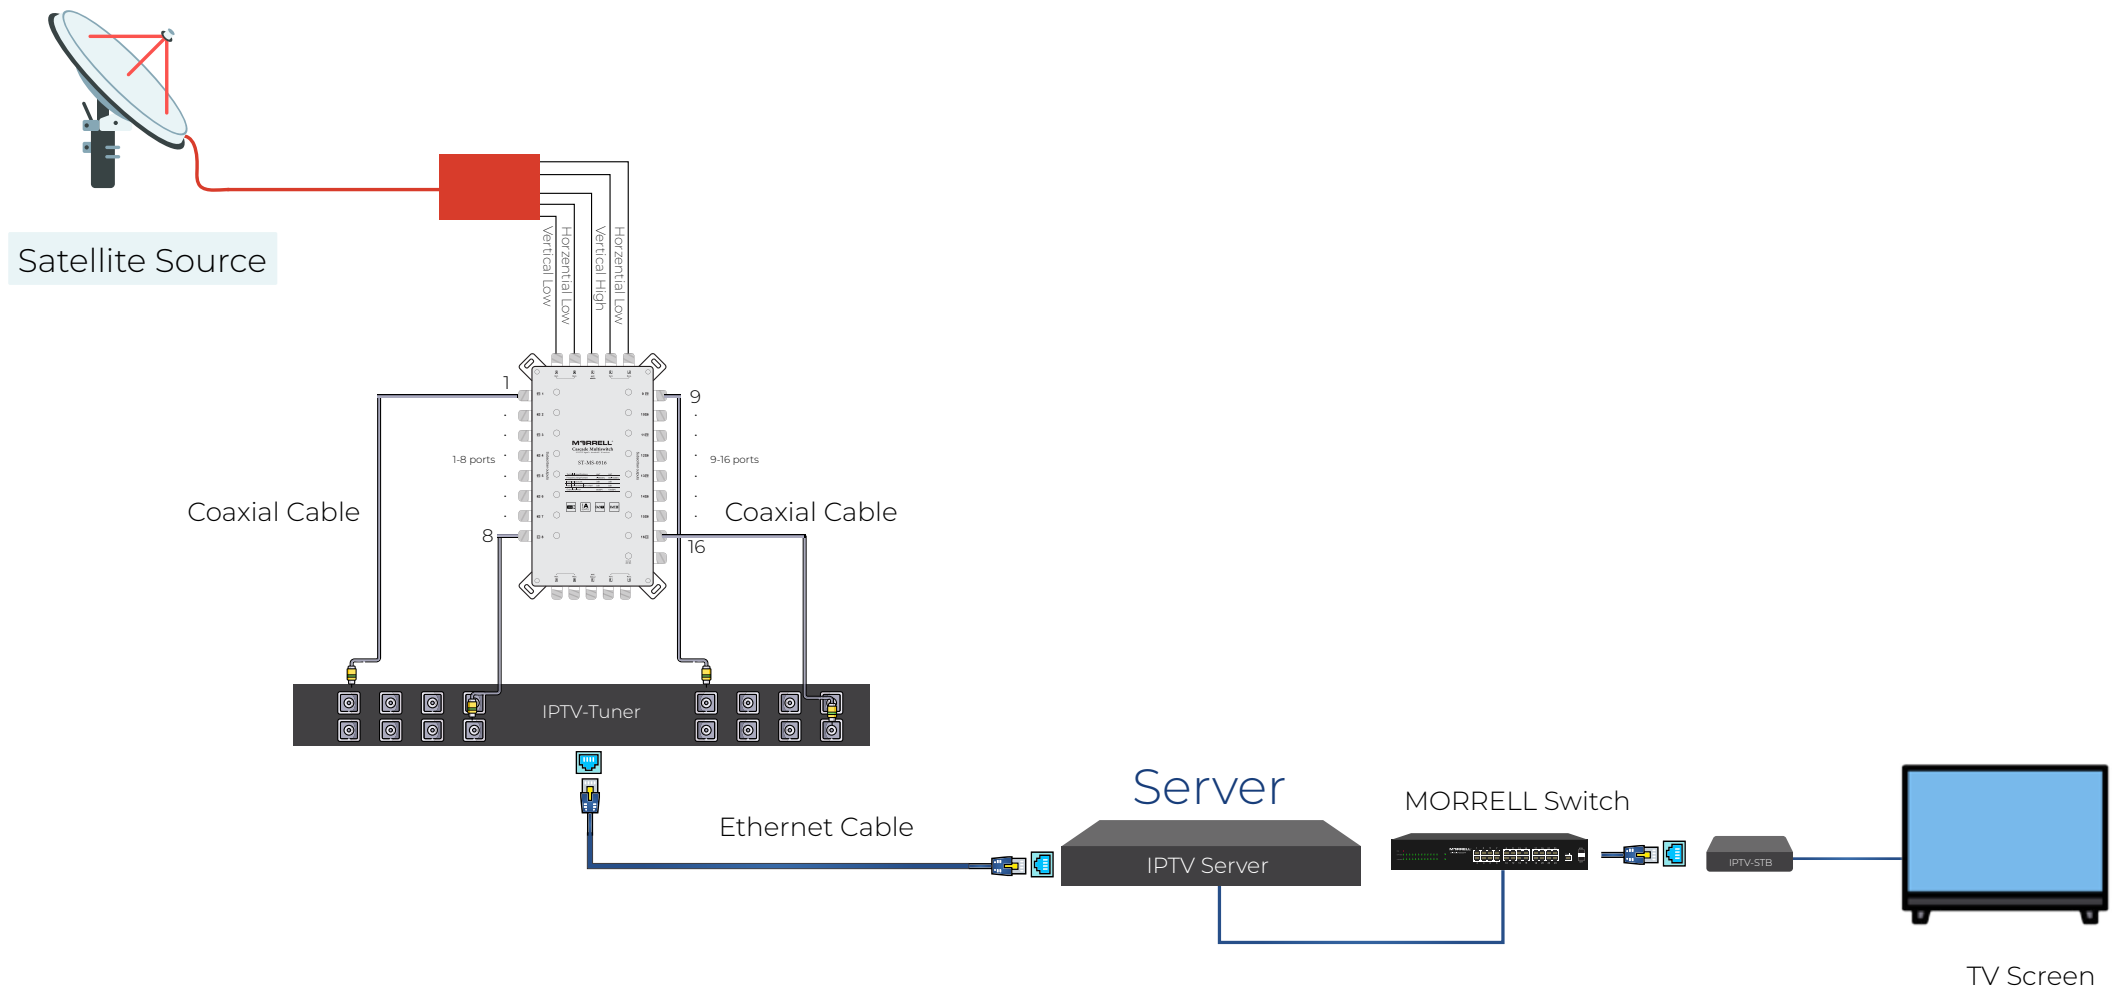

- ▶ IPTV Tuner head-end convert up to 16 frequencies to a single Ethernet output port by using internet protocol.
- ▶ The device integrates tuner demodulation and IP gateway functionality, which can demodulate the signals 16 tuners into MPTS or SPTS via UDP and RTP/RTSP protocols.
- ▶ Support 16 FTA DVB- S/S2/S2X (DVB-C/T(T)/ISDB-T/ATSC optional)input, 2 ASI input.
- ▶ Support BISS descrambling.
- ▶ Support DiSEqC function.
- ▶ 16 MPTS or 512 SPTS output (MPTS and SPTS output switchable).
- ▶ 2 GE mirrored output (IP address and port number of GE1 and GE2 are different), up to 850Mbps---SPTS.
- ▶ 2 independent GE output ports, GE1 + GE2---MPTS.
- ▶ Support PID filtering, re-mapping (Only for SPTS output).
- ▶ Support “Null PKT Filter” function (Only for MPTS output).
- ▶ Support Web operation.

02 | Multi-Channel Encoder IPTV-ENCODER

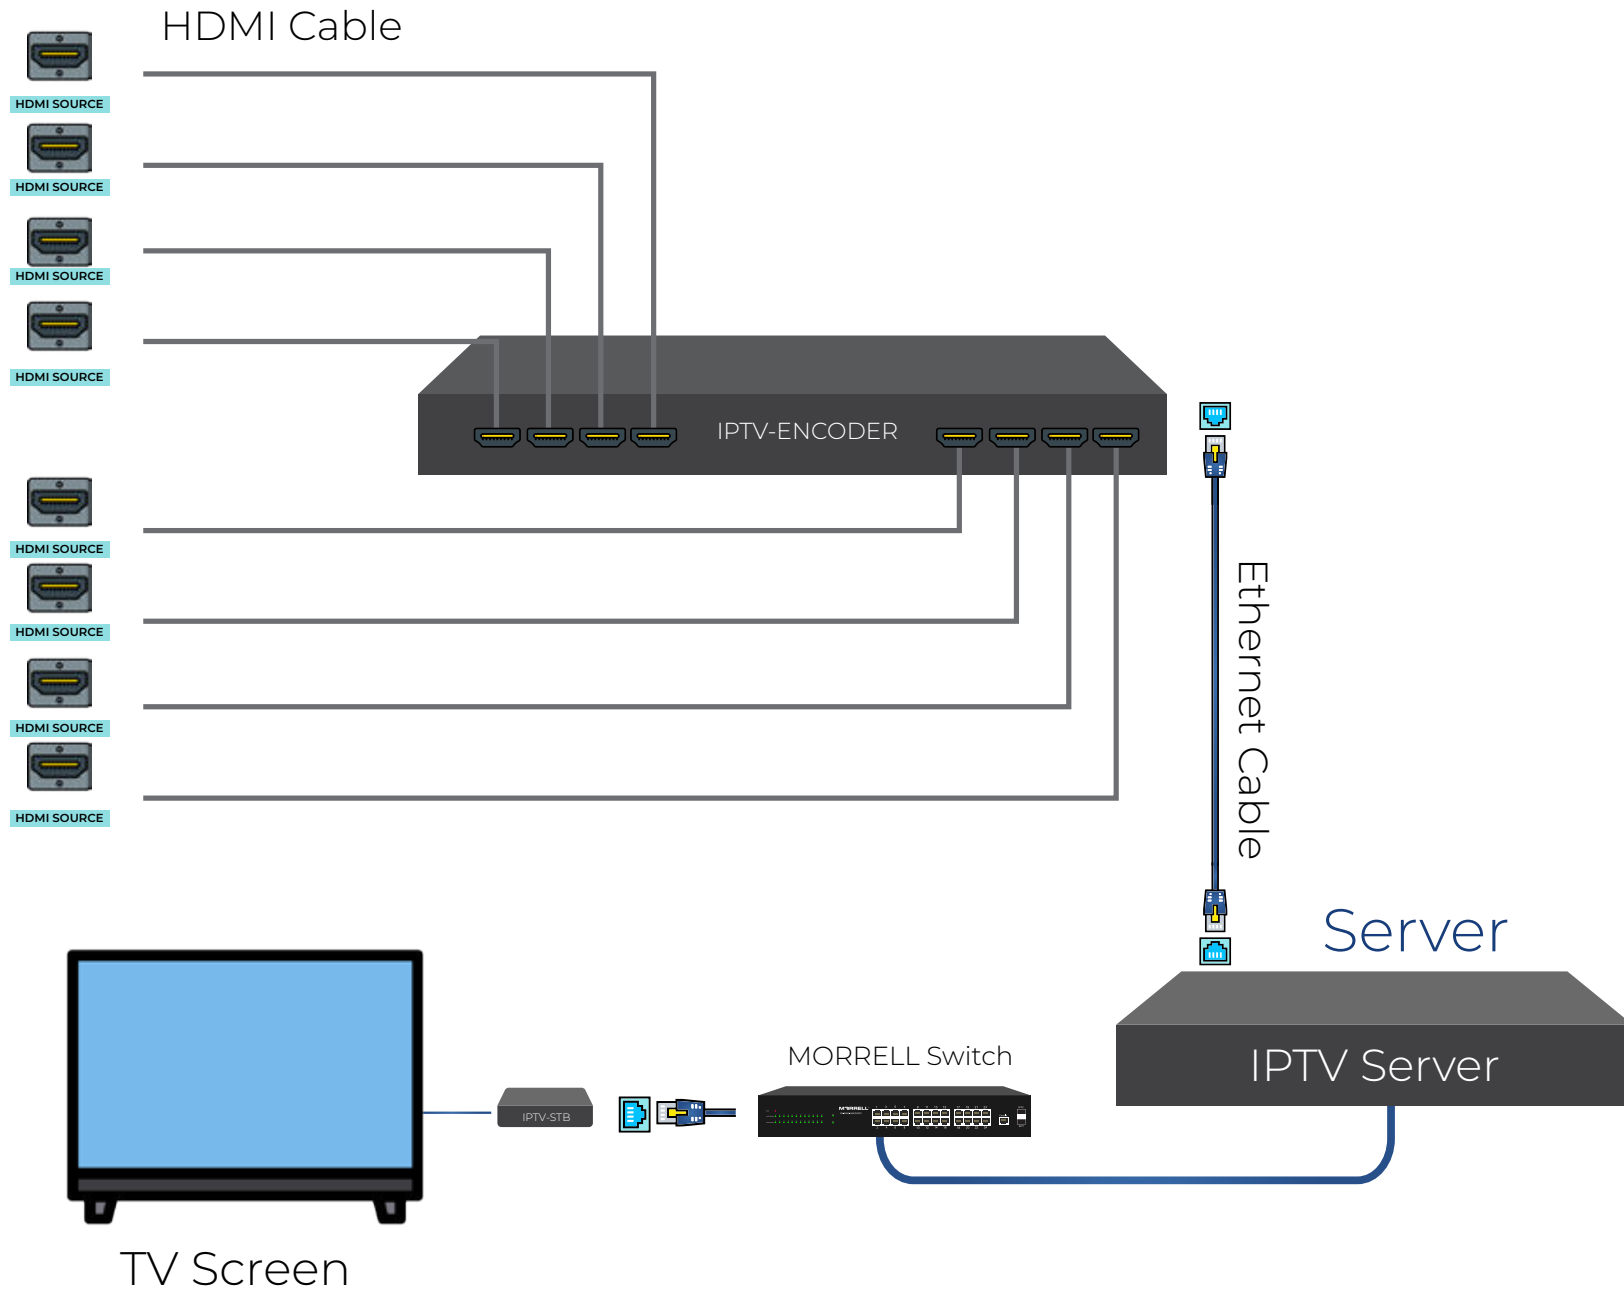

Features:

- ◀ 8 HDMI inputs with 8 SPTS and 1 MPTS output (each encoder module), max 24 HDMI inputs.
- ◀ MPEG4 AVC/H.264 video encoding format.
- ◀ MPEG1 Layer II, LC-AAC, HE-AAC audio encoding format and AC3 Pass Through, and audio gain adjustment.
- ◀ IP output over UDP and RTP/RTSP protocol; 1 ASI out as mirror of MPTS (Optional).
- ◀ Support QR code, LOGO, caption insertion (Language Supported: 中文, English, Thai, Arabic, русская, العربية for more languages please consult us...)
- ◀ Support "Null PKT Filter" function.
- ◀ Control via web management, and easy updates via web
- ◀ IPTV Encoder head-end convert up to 16 HDMI Source to a single Ethernet output port by using internet protocol.
- ◀ The device integrates Encoder demodulation and IP gateway functionality, which can demodulate the signals 16 HDMI into MPTS or SPTS via UDP and RTP/RTSP protocols.

Specifications:

03 | HD IPTV Set Top Box IPTV STB

Features:

- ◀ The function of the STB is to convert the amenable incoming signal into the video signal which the user can watch on their televisions with the support of the HDMI cable cable.
- ◀ One end of the STB is connected to the TV while the other end is connected using an Ethernet cable via a network switch that is connected to the server.
- ◀ The set-top box has other many ports and characteristics.
- ◀ The set-top box can be connected with smartphones easily by using Wi-Fi networks.
- ◀ Personalized EPG interface for hotel, hospital, Community , and other industries.
- ◀ System wallpaper is changeable and EPG content is editable.
- ◀ Various business modes blend in the IPTV system.
- ◀ Support modular interface and convenient to docking with third part manage software.
- ◀ Hotel, hospital, and community version can support set up advertisement business to increase revenues.

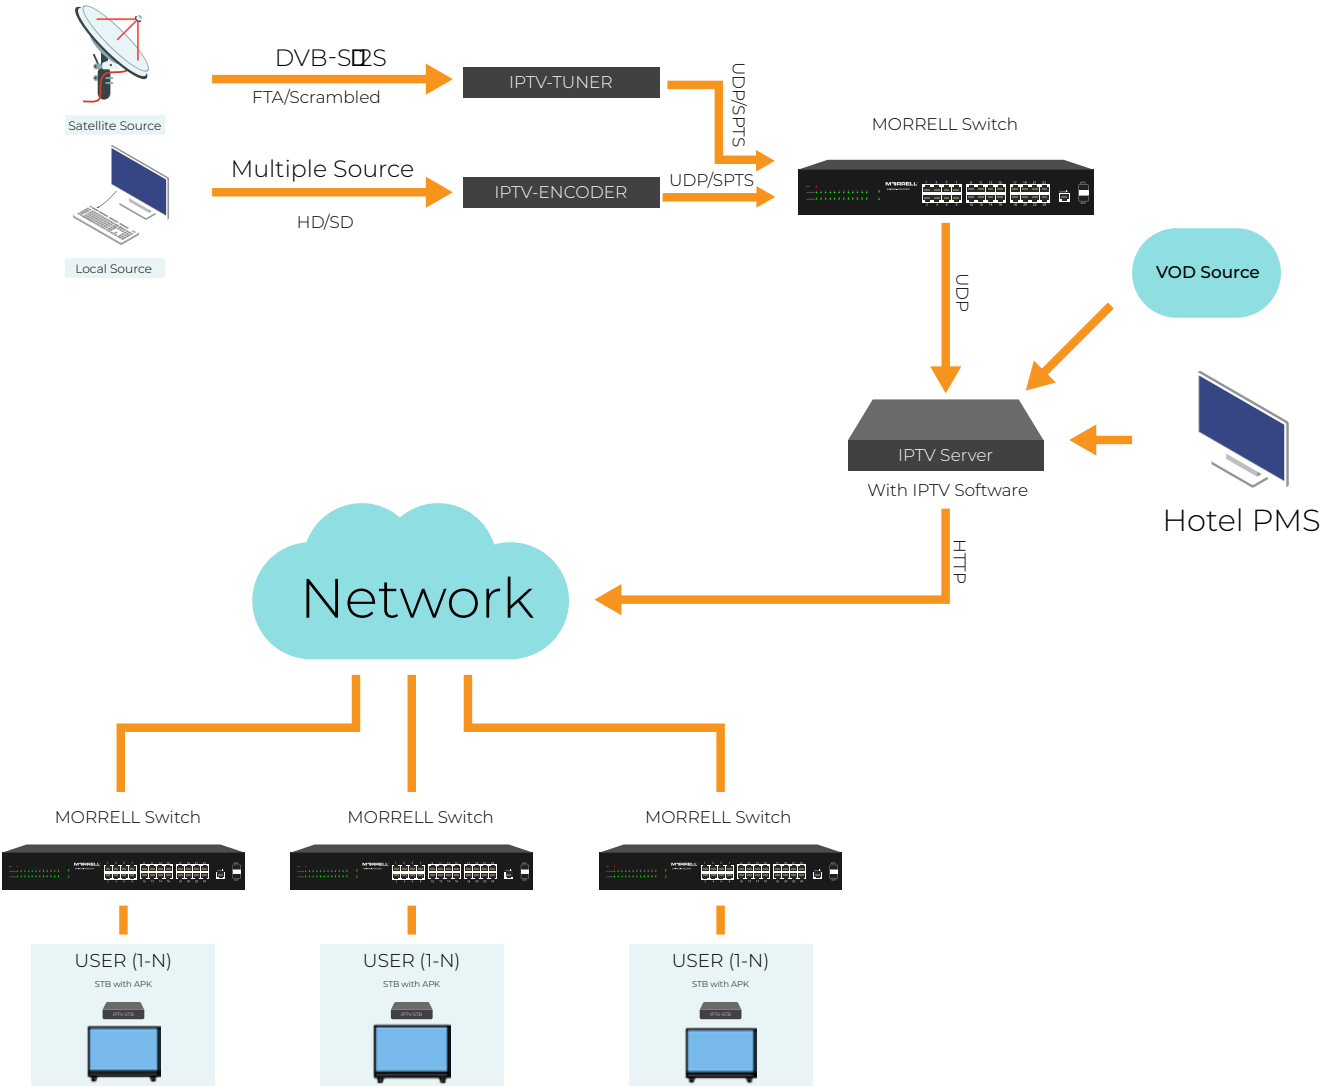

Specifications:

MULTISWITCHES

5-WAY MULTISWITCHES

5-way multi switches are used for receiving four satellite signals and one ANT signal. Five inputs are distributed for the subscribers to be used simultaneously without mutual interference. They are widely used in digital satellite TV systems.

A 5-way multi-switch is supplied by an external 20V 1200mA DC power supply. For its special requirement, it is equipped with a switching power supply that can work with AC 110v-240v.

The Power supply has protection for short circuit. If the connection is a short circuit, the power supply will be cut off under the protection. It can work with a wide temperature range of -20 to +60 degrees C, It can be used indoors directly, waterproof protection will be needed when it is used for outdoor environments.

5-WAY MULTISWITCH

01 | ST-MS-0516

Features:

- ◀ 5-way multi switches for 16 or 32 subscribers.
- ◀ Excellent quality Kirkstie alloy housing, making installation convenient.
- ◀ Excellent quality component, professional amplification design, and low loss.
- ◀ External 20V 1200mA DC power offering more stable operation.
- ◀ 13/16V 0/22KHz DiSEqC 1.0/2.0 supplied by satellite receiver through coaxial cable to switch corresponding port.
- ◀ Capable of connecting four SATV signals, one ANT signal or FM broadcast simultaneously.
- ◀ Five input signals and distributed into different subscribers for simultaneous use and no mutual interference.
- ◀ Support multi-satellite, multi-receiver and cascadable usage.

MULTISWITCHES

9-WAY MULTISWITCHES

9-way multi switches are used for receiving eight satellite signals and one ANT signal. Nine inputs are distributed for the subscribers to be used simultaneously without mutual interference. They are widely used in digital satellite TV systems.

A 9-way multi-switch is supplied by an external 20V 2500mA DC power supply. For its special requirement, it is equipped with a switching power supply that can work with AC 110V-240V. The Power supply has protection for short circuit. If the connection is a short circuit, the power supply will be cut off under the protection.
